STATEWIDE CURRENT SITUATION: Tropical Storm Harvey continues to produce devastating flooding. Harvey currently has sustained winds of 45 miles per hour (mph) with higher gusts. The center of the storm is located about 70 miles east of Port O'Connor and is slowly moving east-southeast at three mph. Little change in strength is forecast during the next 24 hours.

The primary threat with this storm over the next few days will remain devastating, life threatening flooding. Harvey is expected to produce additional rainfall accumulations of 10 to 20 inches through Thursday over parts of the upper Texas coast into southwestern Louisiana. Isolated storm totals may reach 50 inches over the upper Texas coast, including the Houston/Galveston metropolitan area. With the current track and rainfall forecast, concern is increasing for flooding in the river basins in East Texas.

Storm Surge Watches have been issued from Port Aransas Texas to Morgan City Louisiana including Galveston Bay. The combination of a dangerous storm surge and the tide will cause normally dry areas near the coast to be flooded by rising waters moving inland from the shoreline. The water is expected to reach one to three feet above ground if the peak surge occurs at the time of high tide.

Tornadoes are possible within the storm's rain bands over the next couple days along the upper Texas coast in Southeast Texas.

The GLO is in the process of identifying, through both aerial and on the ground activities, the removal of debris on state owned uplands and submerged land. To address some of the short-term needs, the GLO established an Incident Command Post (ICP) in Robstown to coordinate response efforts.

Field personnel received assignments from the Galveston County Office of Emergency Management and provided two boat crews and one support trailer. The crews began working between Interstate Highway (IH) 45 and State Highway (SH) 3 in Dickinson. Prior to deployment, all equipment was inspected and a safety meeting was conducted regarding working in emergency response operations and the hazards associated with both high and swift water boat operations. One boat crew was subsequently redeployed to SH 146 near Dickinson Bayou to check lower bayou area as the water was receding by SH 3 and high-profile vehicles are being deployed to conduct SAR. The other boat crew was redeployed to provide transportation to Galveston County Judge and various staff on a damage survey of the flooded areas of Dickinson Bayou.
